Ottawa, ON

| Professional Summary

Full-Stack Developer shipping production React and Node.js apps end to end - from REST API design and authentication to deployed frontends on custom domains. Six years experience in firefighting drives accountability, structured thinking and composure under pressure.

| Technical Skills

- **Languages:** JavaScript, TypeScript, HTML, CSS
- **Front-End:** React, Next.js, Tailwind CSS, Framer Motion, Vite, Responsive Design
- **Back-End:** Node.js, Express, REST APIs, MongoDB, JWT, Cookies
- **Tools:** Git, GitHub, Postman, VS Code, Chrome DevTools, Netlify, Render
- **Practices:** Agile/Scrum, API Design, Authentication Flows, Debugging

| Projects

- **Public Safety - Community Platform & Admin Dashboard** 2025
Live: <https://public-safety.kevonsenior.com> Repo: https://github.com/seniork7/public_safety
React/Node.js/Express/MongoDB/JWT/Cookies/Tailwind/Framer Motion
 - Built and deployed a full-stack MERN app with a public community site and protected admin dashboard serving 7 REST endpoints
 - Implemented JWT auth with httpOnly cookies and two-tier role based access (Admin vs Demo_Admin) enforced on both server and client
 - Designed an admin dashboard with real-time stats, approve/reject workflow, and applicant detail panel with admin notes
 - Architected a clean layered structure (routes -> controllers -> models); deployed frontend to Netlify and backend to Render with custom domain configuration
- **Civron - B2G Public Safety Data Platform (In Development)** 2026
Live: <https://www.civron.io/auth/login> Repo: <https://github.com/seniork7/civron-api>
Next.js/Typescript/Node.js/Express/MongoDB/node-cron/express-rate-limit
 - Architecting a multi-tenant B2G platform where government agencies submit structured public safety data through a protected ingestion layer and expose it through a unified public REST API
 - Designed type-aware incident deduplication across 30+ incident categories with domain-calibrated time windows - duplicate submissions return a 409 with the conflicting record and a force-submit option, letting agencies override genuine cases without losing data
 - Building front-end with Next.js, TypeScript, shadcn/ui, React Hook Form & Zod, and TanStack Query - auth proxied through Next.js route handlers to keep the backend API from being directly exposed to the browser

| Experience

- **Store Associate - Dulux Paints, Ottawa, ON** May 2024 - May 2026
 - Deliver product consulting and issue resolution across high-volume customer interactions, maintain strong attention to detail while balancing multiple requests and operational tasks
- **Firefighter - Jamaica Fire Brigade, Jamaica** Feb 2017 - Sep 2023
 - Responded to emergency incidents over 6+ years where clear communication, procedural discipline and reliability were non-negotiable
 - Coordinated with multiple teams in rapidly evolving situations, executing protocols accurately while adapting to new information

| Education

- **Interactive Media Design Diploma** – Algonquin College, Ottawa Jan 2024 - Dec 2025
- **Information & Communication Technology** – VTDI, Jamaica Sep 2021 - Jun 2022
